Elsaß-Lotharingen was for the German postal authorities the test case for various labels: registered covers and covers and parcels for Remboursement (Cash on Delivery).

The first labels were distributed to the various post offices in 1871. Later on these labels were printed by the various post offices, so small variances in colour and lettering are common.

Two main categories can be classified: value in "Cent" and value in "Groschen".

A special study on this subject was issued by Mr. Jean-Pierre Bournique called:

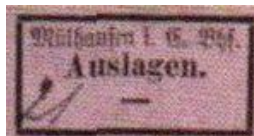

"Postvorschuss, Auslagen et Nachnahme" edited by: Association SPAL, editions-spal@outlook.fr
